Summary of Industry

IT INDUSTRY OVERVIEW

The importance of technology in our modern world means that the technology industry is a true force to be reckoned with. The sheer size of the industry makes it one of the dominant sectors in the global economy, and the rapid growth and rate of change within the industry make it a central player in developing business standards and regulations. The impact of technology goes far beyond the core tech industry, though. While there are myriad opportunities directly related to digital product development or service delivery, there are countless more opportunities opening up around the world as technology influences every business and every industry vertical.

Finally, the amount organizations are spending on IT demonstrates the rapidly changing nature of technology. Gartner estimates that 2023 global IT spending will reach \$4.6 trillion in 2023, a jump of 5.1% over 2022 spending. The categories included in Gartner’s estimate are traditional IT components: Communications services, IT services, devices, software and data center systems. As expected, the service categories are the largest pieces, as most organizations have built a foundational layer of computing and are now crafting new solutions on top of that foundation. In addition to these traditional categories, emerging technology is driving additional spending. Data from IDC, which CompTIA has used in previous years, shows roughly the same level of spending in the traditional categories. IDC, though, adds a category of “new technologies,” which includes technology such as internet of things (IoT), robotics and mixed reality. Spending on new technologies is expected to hit \$1.36 trillion in 2023, adding nearly 30% to the expected spending on traditional items. One final note on spending projections: The current economic chaos, including inflation and relative strength of global

currencies, is impacting forecasting models as much as it is driving uncertainty for businesses. Actual spending may fluctuate more in 2023 than in previous years.

All in all, the impact of technology today goes far beyond the technology itself. Technology is deeply ingrained into business activity and daily life. There is no question that there are some negative elements, especially as technology applications reach massive scale and trigger unintended consequences. However, there is also no question that there are many positive outcomes, and a progressive approach to technology is a critical factor for sustained success.

METAL TRADE INDUSTRY

Metal supply is set to recover following disruptions in 2022. The supply outlook for 2023 is more favorable due to lower energy prices and as temporary production and supply bottlenecks are resolved. Coal prices dropped by 52% from their peak in August 2022 to April 2023, while Europe and U.S. natural gas prices fell by 81% and 75%, respectively, during the same period. On the supply side, most aluminum and zinc smelters in Europe have restarted operations, and new supply capacity is expected to come online this year for several metals, including aluminum in China, copper in South America, and nickel in China and Indonesia. The current improved environment follows various supply disruptions for several metals last year, caused by logistical problems, plant maintenance, power shortages, social unrest, adverse weather conditions, and high energy prices.

Slower global activity and a services-oriented recovery in China are expected to dampen metal demand. The surge in metal prices at the start of the year reflected optimism for a robust recovery in China as well as improved global growth prospects. However, this optimism faded in 2023Q1 as China's growth was mainly driven by consumer spending in the services sector—a trend that is expected to persist for the remainder of 2023. Although China's property sector has begun to stabilize, its recovery remains subdued due to high debt levels. Persistent high inflation, tight monetary policy, and concerns about credit constraints following recent banking sector stress in advanced economies will likely dampen consumer demand.

Upon the occurrence of any of the aforementioned events, our Company may seek further legal recourse, which could be time consuming and costly and the outcome cannot be guaranteed. While any other aforementioned events have not occurred, however we cannot assure you that the occurrence of any such events would not adversely affect our business operations, financial conditions, reputation and image. For further details, please see “*Outstanding Litigation and Material Developments*” on page 102 and 107 of the Letter of Offer.

3. We do business with our customers on purchase order basis and do not have long-term contracts with most of them.

Our business is conducted on purchase order basis, depending on the requirements of the client preferences and demand. We do not have long-term contracts with our customers and there can be no assurance that we will continue to receive repeat orders from any of them. Further, even if we were to continue receiving orders from our clients, there can be no assurance that they will be on the same terms, and the new terms may be less favourable to us than those under the present terms.

4. Our IT business may not be protected by all intellectual property laws and does not have any copyright.

Our IT business may not be adequately protected by all intellectual property laws. Rivals or even our employees, associates or any other person may copy or reproduce them, which would reduce our company’s ability to compete and effect our market share in this particular product software developed. If they copy our company’s software products, our company could lose out on sales-related revenue. A lack of intellectual property protection could prevent our company from licensing its software to others, which could result in a loss of revenue from operations. A business’s reputation could suffer if our Company becomes embroiled in legal disputes involving intellectual property rights. It could also lose the confidence of our clients. If our company does not have the necessary intellectual property protection, we may lose out on opportunities for partnerships or other forms of cooperation with other businesses.

5. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital, which is based on certain assumptions, and accordingly, any change of such assumptions would result in changes to our working capital requirements. As per our settled business terms, we require the end-use customers and our intermediaries to pay the full amount of the consideration only after they receive the product, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and other day to day expenses.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “Objects of the Issue” on page 47. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by the end-use customers or our intermediaries may increase our working capital requirement. Further, if a customer or an intermediary default in making payment for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. All of these factors may result, or have resulted, in increase in the amount of receivables and short-term borrowings. Continued increase in working capital requirements may adversely affect our financial condition and results of operations. We may also have large cash flows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims. Moreover, we may need to incur additional indebtedness in the future to satisfy our working capital needs.

6. *Expansion into new market segments may subject us to various challenges, and our inability to successfully diversify our product offerings may adversely affect our growth and negatively impact our profitability.*

We may attempt to diversify and expand our business operations by adding additional products in our product portfolio catering to customers in newer sectors. We have limited experience and knowledge of carrying out such operations, and our foray into the same may be subject to high barriers to entry, including existing competition and market dynamics. Due to our limited experience, our entry into new business segments may not be successful, which could hamper our growth and damage our reputation. Venturing into a new product line may also require methods of operations and marketing and financial strategies different from those currently employed in our Company. We will be subject to the risks generally associated with new product introductions and applications, including unproven know-how, unreliable technology, inexperienced staff, delays in product development and possible failure of products to operate properly. We may also encounter other additional anticipated risks and significant competition in such markets. We cannot assure you that we will be able to successfully develop our new product lines, and may not be able to successfully develop or introduce new products on a timely basis or at all, or ensure that they are less costly than those of our competitors; or to offer customers payment and other commercial terms as favourable as those offered by our competitors. If our competitors outperform our business and develop superior products at a lesser cost in a timely manner, our growth and financial results could be adversely affected.

Furthermore, our new business or projects may turn out to be disruptive and may cause an interruption to our existing business as a result. We cannot assure you that the transition of our manufacturing facilities and resources to fulfil production under new product programs will not impact production rates or other

operational efficiency measures at our facilities. We also cannot assure you that we will succeed in effectively implementing new technology in manufacturing new products or that we will recover our investments. Any failure in the development or implementation of our operations is likely to adversely affect our business, results of operations and cash flows.

7. *Our business depends on our ability to attract and retain skilled sales personnel and competition for such personnel is intense. Failure to attract such personnel could materially and adversely affect our business, results of operation and financial condition.*

In our industry, the level, trustworthiness and quality of sales personnel and customer service are key competitive factors and an inability to recruit, train and retain suitably qualified and skilled sales personnel could adversely impact our reputation, business prospects and results of operations. A significant increase in the attrition rate would increase our recruiting costs and decrease our operating efficiency, productivity and profit margins and could lead to a decline in demand for our products.

8. *Undetected software design defects, errors or failures may result in loss of or delay in market acceptance of our products or in liabilities that could materially adversely affect our business, financial condition and results of operations.*

Our IT product solutions involve a high degree of technological complexity and have unique specifications which could contain design defects or software errors such as errors in coding or configuration that are difficult to detect and correct. Errors or defects may result in the loss of current customers and loss of, or delay in, revenues, loss of market share, loss of customer data, a failure to attract new customers or achieve market acceptance, diversion of development resources and increased support or service costs. We cannot assure you that, despite testing by us and our customers, errors will not be found in new software product development solutions, which could result in litigation and other claims for damages against us and thus could materially adversely affect our business, financial condition and results of operations. Our inability to timely respond to upgraded technology, will affect our business and profitability adversely.

To the extent that we suffer any loss or damage, not covered by insurance, our business and results of operations could be adversely affected.

10. *Our revenues are significantly dependent upon trading of a few products.*

Our business is spread within Gujarat, India only. Consequently, our income is significantly dependent on sales of our products and over the years, such sales have emerged as the single contributor to our revenue and business. Our continued reliance on trading of different types of materials for a significant portion of our revenue exposes us to risks, including the potential reduction in the demand in the future; increased competition from domestic players; the invention of superior and cost effective technology; fluctuations in the price and availability of the raw materials; changes in regulations and import duties; and the cyclical nature of our customers' businesses.

11. *Insufficient cash flows to meet required payments on our debts and working capital requirements could adversely affect our Company's operations and financial results.*

The business of our Company requires a significant amount of working capital to finance the purchase of raw materials and maintain the inventories. The working capital requirements of our Company are also affected by the credit lines that our Company extends to its customers and also risk on buyer in line with the industry practice. Moreover, our Company may need to raise term loans and working capital loans in the future to meet its capital expenditure and to satisfy its working capital requirements. 15. *We are highly dependent on our Promoters, Directors and key management personnel and the loss of such persons, or our inability to attract and retain such personnel in the future, could adversely affect our business, growth prospects, results of operations and cash flows.*

Our ability to meet future business challenges depends on our ability to attract, recruit and retain talented and skilled personnel. We are highly dependent on our Promoter, our Directors and key managerial personnel. Further, our Company has not obtained any directors and officers liability insurance for our Directors and key managerial personnel. The loss of any of our Promoters, our Directors, senior management, external consultants or other key management personnel, or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business, growth prospects, results of operations and cash flows. We may also need to increase our pay structures to attract and retain such personnel. Our future performance will depend upon the continued services of these persons.

16. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The trading and IT sectors are highly fragmented and competitive. Our Company would not only compete with organized players but also a high percentage of unorganized players at local and national levels. Some of them may offer better quality products at competitive prices and may be capable of providing more personalized services to each client due to the smaller number of orders placed with them. Further, these unorganized players offer their services at highly competitive prices having well established presence in their local markets. Aggressive discounting by competitors, including liquidating excess inventory, may also adversely impact our performance in the short term.

In addition, there are minimal entry barriers in this sector and hence they may also face competition from new entrants. Some of our employees, who have disassociated themselves from the Company, may also compete with our Company.

17. *We are a listed company and are required to comply with rules and regulations imposed by the Stock Exchanges and SEBI with respect to continuous listing and the Companies Act. 18. *We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.*

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Efficient communication with the clients is the heart of our business. Though the clients get their registration on line and has to come personally to office to submit their documents, for communications through mails and phone/calls, we are totally dependent on Telecommunications and information technology systems, networks and infrastructure, even for communication with the local representative spread over at National and International level, we require to have effective email communication. Breaches of our information technology systems may result in

unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. While, the aforementioned events have not been materially occurred, future occurrence of any such events, could impact our business operations and results of operations.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

We cannot assure you that the relevant authorities will approve and provide us with such licenses, approvals and registrations for our new business or will renew such licenses, approvals and registrations, or if renewed would do so in a timely manner. Further, we have applied for registration of a Word Mark nextgenshaadi.com  under the provisions of the under the classes 42 of the Trademarks Act, 1999 on 10/05/2023. The said application is pending for registration. We have not registered any of our brands under the Trademark Act, 1999 and therefore, if we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations. As a result, we may not be able to prevent infringement of our un-registered brands and a passing off action may not provide sufficient protection until such time that this registration is granted. While the aforementioned events have not occurred in the past, however occurrence of any such events could adversely affect our business operations.

- 21. Our Company has reported negative cash flow from operating and investing activities in the past. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.**

Further, we also cannot assure you that our recently introduced products would bring the desired result or would be accepted by our customers as our existing products. In the event, our new line of product is unable to bode well with the customers or if we are unable to justify the quality of our new products, it may have an adverse effect on our competitiveness, business operations and revenue.

Our inability to execute our growth strategies in a timely manner or within budget estimates or our inability to meet the expectations of our customers and other stakeholders could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations. The development of such future business could be affected by many factors, including general, political and economic conditions in India, government policies or strategies in respect of specific industries, prevailing interest rates and price of equipment and raw materials. Further, in order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Failure to manage growth effectively could adversely affect our business and results of operations.

29. *If we are unable to raise additional capital for our business, it may delay our Company's growth plan and have a material adverse effect on our business and financial condition.*

We will continue to incur significant expenditure in maintaining and growing our existing business operations. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, if we are unable to arrange adequate financing on a timely basis, it could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and regulatory framework that allows us to raise capital. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

30. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

Our Company has not paid any dividend since incorporation. However, our ability to pay dividends in the future will depend on number of factors, including our profit after tax for the fiscal year, utilization of the

profit after tax towards reserves, our future expansion plans and capital requirements, our financial condition, our cash flows and applicable taxes, including dividend distribution tax payable by our Company. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and subsequent approval of shareholders and will depend on factors that our Board and shareholders deem relevant. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. Further, dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. We cannot assure you that we will be able to pay dividends in the near or medium term or future, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

31. *We are dependent on our Promoter, our senior management, directors and key personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.*

Our Promoter, Directors, senior management and key managerial personnel collectively have vast years of experience in the industry and are difficult to replace. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to Section "Our Management" on page 69 of this Letter of Offer. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently.

Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new plans and expand our business.

32. *Our Promoter and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters' shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

33. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.*

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our Board. In addition, schedule of implementation as described herein are based on management's current expectations and are subject to change due to various factors some of which may not be in our control.

34. *Any variation in the utilization of the Net Proceeds as disclosed in this Letter of Offer shall be subject to certain compliance requirements, including prior Shareholders' approval.*

Our Company intends to deploy and utilize Net Proceeds raised pursuant to the Rights Issue in the manner set out in the section titled “**Objects of the Issue**” on page no. 47 in the Letter of Offer. In accordance with SEBI LODR Regulations and other applicable provisions, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Letter of Offer without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations and it may also lead to delay in deployment of funds as per the schedule of implementation as disclosed in objects section titled “**Objects of the Issue**” on page no. 47 in the Letter of Offer. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Rights Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

- 35. *Our Company’s management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.***

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Net Issue Proceeds to the BSE Limited and shall also simultaneously make the material deviations/ adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 36. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet.***

We have not commissioned an industry report, for the disclosures which need to be made in the chapter titled “Industry Overview” of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

ISSUE SPECIFIC RISK FACTORS

- 37. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further in case the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

- 38. *Any future issuance of the Equity Shares, or convertible securities by our Company may dilute your***

future shareholding and sales of the Equity Shares by our Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, or convertible securities by our Company, including through exercise of employee stock options or restricted stock units may lead to dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. Further, any future sales of the Equity Shares by the Promoters and members of our Promoter Group, or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

39. Investors may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that the Investors subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. Investors can start trading the Equity Shares allotted to them only after receipt of the listing and trading approval in respect thereof. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Issue Shares to the date when trading approval is granted for them. Further, we cannot assure you that the Equity Shares allocated to an Investor will be credited to the Investor's demat account or that trading in the Equity Shares will commence in a timely manner or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

40. Investors will not have the option of getting the Allotment of Rights Equity Shares in physical form and the Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form ("Physical Shareholders") may lapse in case they fail to furnish the details of their demat account to the Registrar.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of the Equity Shares and except the pending transfers). For details, refer chapter titled "***Terms of the Issue - Procedure for Application by Eligible Equity Shareholders holding Equity Shares in physical form***" on page 123 of this Letter of Offer.

41. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI ICDR Regulations, the Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Issue Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their Applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Issue Shares at a price that will be higher than the actual market price of the Equity Shares at

that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

42. *Your ability to acquire and sell the Issue Shares offered in the Issue is restricted by the distribution, solicitation and transfer restrictions set forth in this Letter of Offer.*

No actions have been taken to permit an offering of the Issue Shares in the Issue in any jurisdiction except India. As such, our Issue Shares have not and will not be registered under the U.S. Securities Act, any state securities laws or the law of any jurisdiction other than India. Further, your ability to acquire Issue Shares is restricted by the distribution and solicitation restrictions set forth in this Letter of Offer. For further information, please refer to the chapters entitled 'Notice to Investors', 'Other Regulatory and Statutory Disclosures' and 'Restrictions on Foreign Ownership of Indian Securities' on pages 10, 109 and 146 respectively. You are required to inform yourself about and observe these restrictions. Our representatives, our agents and us will not be obligated to recognize any acquisition, transfer or resale of the Issue Shares made other than in compliance with applicable law.

43. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares preemptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained Government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

44. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to long-term capital gains tax in India if Securities Transaction Tax (STT) is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares, except in the case of such acquisitions where STT could not have been paid, as notified by the GoI under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, Finance Act, 2018, taxes such long term capital gains exceeding ₹1 lakh arising from sale of equity shares on or after April 1, 2018. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

45. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.*

The Indian securities markets are smaller and more volatile than securities markets in more developed economies. The Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of listed securities. Prices of listed securities are subject to volatility linked among other factors to the uncertainty in the global markets and the rising inflationary and interest rate pressures domestically. The

governing bodies of the Indian stock exchanges have, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Future fluctuations or trading restrictions could have a material adverse effect on the price of our Equity Shares.

46. *The Issue Price of our Rights Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue Price of Rights Equity Share may not be indicative of the market price for our Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that the Investors will be able to sell their Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- (a) quarterly variations in the rate of growth of our financial indicators such as earnings per share;
- (b) changes in revenue or earnings estimates or publication of research reports by analysts;
- (c) speculation in the press or investment community;
- (d) general market conditions; and,
- (e) domestic and international economic, legal and regulatory factors unrelated to our performance.

47. *There is no guarantee that the Rights Equity Shares issued pursuant to the Issue will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, permission for listing of the Rights Equity Shares will not be granted until after those Rights Equity Shares have been issued and allotted. In addition, we are required to deliver the Letter of Offer to the Stock Exchanges under the applicable provisions of the Companies Act and the SEBI ICDR Regulations. The trading approvals shall be granted subject to the submission of all other relevant documents authorizing the issuing of Rights Equity Shares. There could be a failure or delay in listing the Rights Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict investors' ability to dispose of their Equity Shares. Further, a closure of, or trading stoppage on the Stock Exchanges could adversely affect the trading price of the Equity Shares.

EXTERNAL RISK FACTORS

48. *Political instability or changes in the government or government policies could impact the liberalization of the Indian economy.*

The performance and growth of our Company is dependent on the health of the Indian economy and more generally the global economy. The economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well. As a result, our business and the market price and liquidity of the Equity Shares may be affected by such economic and / or political changes. While the current government is expected to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no absolute assurance that such policies will be continued. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and specifically have an adverse effect on the operations of our Company.

49. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition,

India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

50. *Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of the Equity Shares.

51. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial condition.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretation of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and / or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial condition.

52. *General economic conditions in India and globally could adversely affect our business, results of operations and financial condition.*

Our business, prospects, results of operations and financial condition depend significantly on worldwide economic conditions and the health of the Indian economy. Various factors may lead to a slowdown in the Indian or world economy which in turn may adversely impact our business, prospects, results of operations and financial condition. Our Company mainly derives revenue from operations in India and the performance and growth of our business is significantly dependent on the performance of the Indian economy. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic

policies, global political environment, volatility in interest rates, volatility in currency exchange rates, volatility in commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our Company's employee costs and decrease our operating margins, which could have an adverse effect on our business, prospects, results of operations and financial condition.

Further the Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, also have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our Company's business. A slowdown in the Indian economy could adversely affect the policy of the Government of India towards the industry in which our Company operates, which may in turn, adversely affect our financial condition. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy, which could materially and adversely affect our business, results of operations and financial condition as well as the market price of the Equity Shares.

53. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition. India's physical infrastructure is in a developing phase, as compared to that of many developed nations.*

Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could have an adverse effect on our results of operations and financial condition.

54. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign rating is Baa3 with a "stable" outlook (Moody's), BBB- with a "stable" outlook (S&P) and BBB- with a "negative" outlook (Fitch). Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

55. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

GLOBAL ECONOMY OVERVIEW

The outlook for the global economy took a positive turn early in the year. Inflationary pressures began to ease, with global energy prices back at levels last seen prior to the invasion of Ukraine. In addition, base effects from the rise in energy prices following the invasion are now coming off, putting further downward pressure on inflation for the rest of this year. Prices of other commodities as well as global food prices have also eased. However, domestic inflationary pressures remain relatively elevated in a number of economies, in particular those with tighter labor markets, although even there inflation probably already passed its peak around the second half of last year (see Chart 1), with headline inflation expected to continue falling this year, and potentially reaching central banks' targets by 2024.

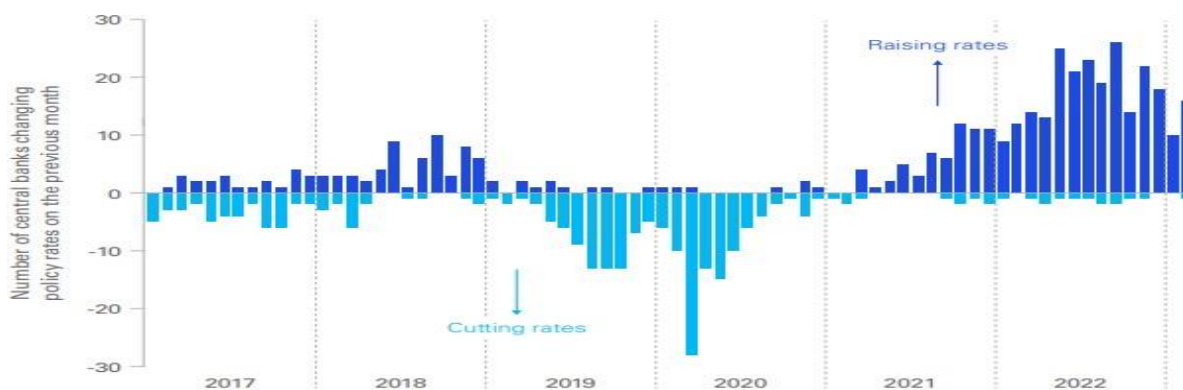

Source: Refinitiv Datastream, KPMG analysis.

Note: The chart excludes Australia and the EU, as EU countries are covered individually.

While the outlook for inflation has improved significantly, many central banks remained cautious at the start of the year. The concern was that the bout in inflation, as a result of the reopening of economies after Covid-19 restrictions followed by a commodity shock due to the invasion of Ukraine, has been embedded in inflation expectations and therefore pricing behaviors of firms and wage expectations of employees. The worry is that inflation could remain sticky, with core inflation (which excludes items such as food and energy) stubbornly high and price rises widespread across the economy due to a relatively tight economic environment in some countries.

Recent tensions in the banking system, which were triggered by the collapse of Silicon Valley Bank and

Signature Bank in the U.S. may complicate matters for central banks. The uncertainty it unleashed will inevitably tighten credit conditions while exposing markets' fragility following an unprecedented period of monetary tightening. Last year saw a sharp rise in policy interest rates, with most central banks raising them significantly during the year (see Chart 2). While the tightening cycle almost reached its course in some economies, other central banks – notably the Fed and ECB – were expected to tighten further. However, latest developments in the banking sector and bond markets could see rates peak sooner and at lower levels.

Source: Bank for International Settlements, KPMG analysis.

Despite the resilience of the labor market and the improving inflation conditions, we expect global economic growth to be relatively modest over the next two years, and to stay below its long-term average (see Chart 4). Global growth is expected to be driven by the recovery of the Chinese economy and a relatively strong growth in some of the emerging markets, while the Eurozone and U.S. economies are expected to contribute less to global growth over the next two years.

Risks to our forecasts are broadly skewed to the downside given the volatility in financial markets. The global economy has been through a series of significant shocks over the past three years – the Covid-19 pandemic and the Russia Ukraine conflict – and saw a major expansion to government debt and a significant hike in policy interest rates by central banks. The ramifications of some of that may not have surfaced yet and we are still to see their full impact and how they interact.

INDIAN ECONOMY OVERVIEW

India's economy grew faster during the first half of FY 23 than other economies, driven by strong demand and investment. Inflationary pressures have been moderating since October, with CPI inflation tempering to an eleven-month low in November. On top of that, it has fallen below the RBI's upper target band for the first time in 2022, mainly driven by the decline in food inflation. Furthermore, inflation expectations have also moderated in the November round of the RBI's Households' Inflation Expectations Survey. This bodes well for augmenting consumption in rural and urban regions in the upcoming months. Improvement in business and consumer sentiment is also likely to bolster discretionary spending. The real investment rate during Q2 of FY 23 prevailing at a high level of 34.6% demonstrates the Government's continued commitment towards asset creation.

The country has transitioned to a modern economy, wherein it has become more globally integrated and exports

a fifth of its output, compared to one-sixteenth at the time of independence. India also benefits from the demographic transition with the help of a lower infant mortality rate and a steady increase in the literacy rate. Therefore, with more equitable income distribution, better employment levels, and globally comparable social amenity provision, India's per capita GDP may expand in the next 25 years as it did in the previous 75 years.

The real GDP in Q3 of 2022-23 registered a YoY growth of 4.4 per cent. Sequentially, the growth in Q3 over Q2 at 3.6% is the same as Q2 over Q1, indicating the sustenance of growth momentum in the first nine months of the year. These estimates reaffirm the ability of the Indian economy to grow on the strength of its domestic demand even as a rise in global uncertainties slows global output. India's Real GDP growth in 2022-23 is projected at 7% by NSO, MoSPI in its 2nd Advance Estimates (AE), the same as in the 1st AE.

The outlay for capital expenditure in 2022-23 (BE) increased sharply by 35.4% from Rs. 5.5 lakh crore (US\$ 66.6 billion) in the previous year (2021-22) to Rs. 7.5 lakh crore (US\$ 90 billion), of which approximately 67% has been spent from April to December 2022 states the Economic Survey 2022-23. The resilient growth of the Indian economy in the first half of FY 23 has been the fastest among major economies, thereby strengthening macroeconomic stability. India registered a broad-based expansion of 9.7% in the first half of FY 23, supported by robust domestic demand and upbeat investment activity.

In January 2023, the following key frequency indicators highlighted improved performances:

- Private consumption stood at 59.5% of the nominal GDP in Q2 of FY23 the highest among the second quarters of all the years since 2013-14, supported by a rebound in contact-intensive services such as trade, hotel, and transport, which registered sequential growth of 16% in real terms in Q2 of FY23 compared to the previous quarter.
- The growth in the agriculture sector continues to remain buoyant, with healthy progress in Rabi sowing, with the area sown increased by 4.37% from 594.62 lakh hectares in 2021-22 to 620.62 lakh hectares in 2022-23 (as of 23-12-2022). To further boost production and support farmers' income, higher Minimum Support Prices (MSPs) have been announced for the upcoming Rabi Marketing Season (RMS 2023-24) in the range of 2.0 to 9.1%.
- CPI inflation eased slightly in March 2023 to 5.6% from 6.4% in February 2023, with a decline in both food and core inflation.
- PMI Services witnessed an uptick and expanded to 57.3 in March 2023.
- The consumption of petroleum products during April-Mar 2023 with a volume of 222.3 MMT reported a growth of 10.2% compared to the volume of 201.7 MMT during the same period of the previous year.
- The Index of Industrial (Production IIP) from April-February 2023 stood at 137.1.
- In FY23 (from April-February 2023), the combined index of eight core industries stood at 144.6.
- Cargo traffic handled at major ports stood at 712.4 million tonnes during April-February 2023.
- Railway freight traffic growth stood at 1,512.1 MT from April-March 2023.
- During April-March 2023, air freight movement increased by 0.4% as compared to Apr-Mar 2022, reaching 3.2 million tons compared to the previous year, indicating that the increase in air freight and traffic activity has been maintained.
- 96.1 crore e-way bills were raised during April-March 2023.

The Union Budget FY24 focuses on four key areas: (i) Sustaining Growth in agriculture, industry, and services besides the green economy; (ii) Inclusive Growth of women, children, and deprived and disadvantaged sections of the society for broad-based development of the economy; (iii) Stimulating Growth through capital expenditure, employment generation, and exports; and (iv) Financing Growth by strengthening the banking and in general, the financial sector.

In addition, steady growth momentum in service activity continues with expansion in PMI Services during Oct-Nov, attributing to the growth in output and accommodative demand conditions, leading to a sustained upturn in sales. Strong growth in fuel demand, domestic vehicle sales, and high UPI transactions also reflect healthy demand conditions.

IT INDUSTRY OVERVIEW

The importance of technology in our modern world means that the technology industry is a true force to be reckoned with. The sheer size of the industry makes it one of the dominant sectors in the global economy, and the rapid growth and rate of change within the industry make it a central player in developing business standards and regulations. The impact of technology goes far beyond the core tech industry, though. While there are myriad opportunities directly related to digital product development or service delivery, there are countless more opportunities opening up around the world as technology influences every business and every industry vertical.

Finally, the amount organizations are spending on IT demonstrates the rapidly changing nature of technology. Gartner estimates that 2023 global IT spending will reach \$4.6 trillion in 2023, a jump of 5.1% over 2022 spending. The categories included in Gartner’s estimate are traditional IT components: Communications services, IT services, devices, software and data center systems. As expected, the service categories are the largest pieces, as most organizations have built a foundational layer of computing and are now crafting new solutions on top of that foundation. In addition to these traditional categories, emerging technology is driving additional spending. Data from IDC, which CompTIA (Computing Technology Industry Association) has used in previous years, shows roughly the same level of spending in the traditional categories. IDC, though, adds a category of “new technologies,” which includes technology such as internet of things (IoT), robotics and mixed reality. Spending on new technologies is expected to hit \$1.36 trillion in 2023, adding nearly 30% to the expected spending on traditional items. One final note on spending projections: The current economic chaos, including inflation and relative strength of global currencies, is impacting forecasting models as much as it is driving uncertainty for businesses. Actual spending may fluctuate more in 2023 than in previous years.

All in all, the impact of technology today goes far beyond the technology itself. Technology is deeply ingrained into business activity and daily life. There is no question that there are some negative elements, especially as technology applications reach massive scale and trigger unintended consequences. However, there is also no question that there are many positive outcomes, and a progressive approach to technology is a critical factor for sustained success.

METAL TRADE INDUSTRY

Metal supply is set to recover following disruptions in 2022. The supply outlook for 2023 is more favorable due to lower energy prices and as temporary production and supply bottlenecks are resolved. Coal prices dropped by 52% from their peak in August 2022 to April 2023, while Europe and U.S. natural gas prices fell by 81% and 75%, respectively, during the same period. On the supply side, most aluminum and zinc smelters in Europe have restarted operations, and new supply capacity is expected to come online this year for several metals, including aluminum in China, copper in South America, and nickel in China and Indonesia. The current improved environment follows various supply disruptions for several metals last year, caused by logistical problems, plant maintenance, power shortages, social unrest, adverse weather conditions, and high energy prices.

Slower global activity and a services-oriented recovery in China are expected to dampen metal demand. The surge in metal prices at the start of the year reflected optimism for a robust recovery in China as well as improved global growth prospects. However, this optimism faded in 2023Q1 as China’s growth was mainly driven by consumer spending in the services sector—a trend that is expected to persist for the remainder of

2023. Although China’s property sector has begun to stabilize, its recovery remains subdued due to high debt levels. Persistent high inflation, tight monetary policy, and concerns about credit constraints following recent banking sector stress in advanced economies will likely dampen consumer demand.

Market Price Forecast 2023-24

Note: f = forecast. The chart displays the percent change in base metals and iron ore price forecasts for 2023 and 2024.

The price outlook faces several upside risks. A stronger-than-expected recovery of China’s real estate sector could boost prices for metals used in construction—such as aluminum, copper, iron ore, and zinc. Disruptions at mines due to weather, technical operating issues, labor disputes, and power/water constraints, could adversely affect raw materials supplies for metals. Trade restrictions could tighten supplies, including export taxes or outright export bans. Other policy interventions, such as further sanctions on Russia and China’s rapidly approaching aluminum production cap, could also limit supply. In the longer term, however, the energy transition could significantly lift the demand for some metals, notably lithium, copper, and nickel.

COMPETITION

The market is highly competitive and fragmented. We compete with a variety of competitors in our trading business and with information technology companies, as well as service providers. Some of our competitors have great financial, workforce, marketing, sales and other resources. However, none of these companies is involved exclusively in a business similar to business of the Company and comparable to the scale of operations. The industry is largely unorganized and fragmented with many small and medium sized companies and entities. All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

iv Revenue Recognition

Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and. Interest Income

For all financial assets measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (FIFP) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "SOP"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "Competent Authority") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("FDI Policy 2020"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("FDI") and approval from the Government of India will now be handled by the FIFP.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the extant policy of the Government of India, erstwhile OCBs cannot participate in this Issue. OCBs or Overseas Corporate Bodies have been de-recognised as a class of investor entity in India with effect from September 16, 2003.

Overseas Corporate Body means a company, partnership firm, society and other corporate body owned directly or indirectly to the extent of at least sixty per cent by Non-Resident Indians and includes overseas trust in which not less than sixty percent beneficial interest is held by Non-resident Indians directly or indirectly but irrevocably, which was in existence as on September 16, 2003, and was eligible to undertake transactions pursuant to the general permission granted under FEMA. Any investment made in India by such entities will be treated as investments by incorporated non-resident entities, i.e. a foreign company.

The Issue, if renounced by our shareholders, may include offers within India, to Indian institutional, non-institutional and retail investors in offshore transactions as defined in, and made in reliance upon exemptions from the registration requirements under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), including the exemption under Regulation S ("Regulation S") of the U.S. Securities Act.

The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
